Race Rights Reparations Fernne Brennan 2017-07-14 This book considers institutional racism as a problem that exists within modern societies. Its roots lie with the transatlantic slave trade and slavery and the solution involves ridding society of the problem. It is argued here that, first, there needs to be an acceptance of its existence, then developing the tools needed to deal with it and, finally, to implement those tools so that institutional racism can be permanently removed from society. The book has four themes: the first considers the nature of institutional racism, the second theme looks at instances of institutional racism through matters such as deaths in custody and skin lightening, the third considers the concept of reparations and the final area looks at the development of social movements as a way of pushing institutional racism up the political agenda. The development of a social movement is part of a social discourse which would, for example, push mentoring as a form of reparations. There is a need for more research on the manifestations of institutional racism and this book is part of that discourse. It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society. This problem has not been addressed through legislation and policies devised to combat racial discrimination. Institutional racism needs to be understood as being located in the processes and procedures of societal institutions.

Technology Adoption in the Caribbean Tourism Industry Andrew Spencer 2020-10-31 This book investigates the adoption of Information and Communication Technologies (ICTs) in Caribbean travel firms, particularly for sales and marketing purposes. By examining the decision-making process in tourism companies deciding whether to become more dependent on digital capabilities and artificial intelligence, this text seeks to understand the role of strategy and resources in technology adoption. Further, the author assesses the role of factors both external (such as culture) and internal (such as leadership) in this strategic process. Economies in the Caribbean are reliant on tourism to bring prosperity to the region, and with the onset of the COVID-19 pandemic, the industry is being forced to transform the way it operates. With implications for those studying organizational behavior as well as strategic and tourism management, this study analyzes rapid change in this

pivotal industry.

*Internet and Society in Latin America and the Caribbean* International Development Research Centre (Canada) 2004 This book presents pioneering research that is designed to show, from a qualitative and ethnographic perspective, how new information and communication technologies, as applied to the school system and to local governance initiatives, merely reproduce traditional pedagogical approaches and the dominant forms by which power is exercised at the local level. The studies thus constitute points of departure for further thinking about the need to promote an Internet culture based on the social application of a OC right to communication and cultureOCO and an OC Internet right, OCO that will permit the establishment of true citizen participation and free access to knowledge, with due regard to personal and individual rights such as those of privacy and intimacy."

*Native on the Net* Kyra Landzelius 2004-11-01 Exploring the influence of the Internet on the lives of indigenous and diasporic peoples, Kyra Landzelius leads a team of expert anthropologists and ethnographers who go on-site and on-line to explore how a diverse range of indigenous and transnational diasporic communities actually use the Internet. From the Taino Indians of the Caribbean, the U'wa of the Amazon rainforest, and the Tunomans and Assyrians of Iraq, to the Tingas and Zapatistas, *Native on the Net* is a lively and intriguing exploration of how new technologies have enabled these previously isolated peoples to reach new levels of communication and community: creating new communities online, confronting global corporations, or even challenging their own native traditions. Featuring case studies ranging from the Arctic to the Australian outback, this book addresses important recurrent themes, such as the relationship between identity and place, community, traditional cultures and the nature of the 'indigenous'. *Native on the Net* is a unique contribution to our knowledge of the impact of new global communication technologies on those who have traditionally been geographically, politically and economically marginalised.

**Commonwealth Caribbean Business Law** Rajendra Ramlogan 2012-05-23 Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. It provides a broad overview of the foundation of various legal systems and goes on to examine the various areas of legal liability that may impact on business activities. These areas include tort law, criminal law, internet law and payment in business transactions. Specifically, the book targets the development of business law in several Commonwealth jurisdictions, including Canada and Australia, but with special focus on legal developments in Commonwealth Caribbean countries. The approach of the book is to present excerpts from judgments, so as to enable students to understand legal principles as espoused by the judiciary without the filtering bias of authors. This new title is essential reading for students taking LLB and Business Degree courses in the Caribbean and other Commonwealth jurisdictions.

**The Politics of the Internet in Third World Development** Bert Hoffmann 2004-10-01 This book examines the political and developmental implications of the new information and communication technologies (NICT) in the Third World. Whereas the concept of the "digital divide" tends to focus on technological and quantitative

indicators, this work stresses the crucial role played by the political regime type, the pursued development model and the specific configuration of actors and decision-making dynamics. Two starkly contrasting Third World countries, state-socialist Cuba and the Latin America's "show-case democracy" Costa Rica, were chosen for two in-depth empirical country studies.

**Wait No More** Benjamin Roseth 2018-06-06 This book is about the smallest unit of public policy: the government transaction. Government transactions—requesting a birth certificate, registering a property, or opening a business, for example—are the way that citizens and companies connect with the government. Efficient transactions enhance the business climate, citizen perception of government, and access to crucial public programs and services. In Latin America and the Caribbean, however, government transactions are often headaches. Public institutions rarely coordinate with each other, still rely on paper, and are more concerned about fulfilling bureaucratic requirements than meeting citizens' needs. *Wait No More* empirically confirms a reality known anecdotally but previously unquantified and offers a path to escape the bureaucratic maze.

*The Global Findex Database 2017* Asli Demirguc-Kunt 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017.

Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

*Sharing Knowledge Making a Difference* World Association for Sustainable Development. International Conference 2011 Information communications technologies (ICTs) are generally viewed as the new vehicle to redress developmental problems. The book assesses the value of such claims by analyzing the structure and workings of the global political economy (GPE) and its impact on, and prospects for developing countries in the current techno-economic context. The book uses a case study of the Caribbean to illustrate the challenges and opportunities faced by small-island developing states (SIDS) in the new techno-economic paradigm. The question must be asked, can small island developing states such as those of the Caribbean leverage modern ICTs for growth and development against the backdrop of a yawning global digital divide? Hence, the book addresses the central problem of the digital divide and whether emerging ICTs offer any real economic opportunities for the Caribbean region.

**Rewriting the African Diaspora in Latin America and the Caribbean** Robert L. Adams Jr. 2014-10-14 This

volume considers the African Diaspora through the underexplored Afro-Latino experience in the Caribbean and South America. Utilizing both established and emerging approaches such as feminism and Atlantic studies, the authors explore the production of historical and contemporary identities and cultural practices within and beyond the boundaries of the nation-state. *Rewriting the African Diaspora in the Caribbean and Latin America* illustrates how far the fields of Afro-Latino and African Diaspora studies have advanced beyond the Herskovits and Frazier debates of the 1940s. The book's arguments complicate Herskovits' insistence on Black culture being an exclusive reflection of African survivals, as well as Frazier's counter-claim of African American culture being a result of slavery and colonialism. This collection of thought-provoking essays extends the concepts of diaspora and transnationalism, forcing the reader to reassess their present limitations as interpretive tools. In the process, Afro-Latinos are rendered visible as national actors and transnational citizens. This book was originally published as a special issue of *African and Black Diaspora*.
