Between Eden and Armageddon Marc Gopin 2002-11-07 Recent years have seen a meteoric rise in the power and importance of organized religion in many parts of the world. At the same time, there has been a significant increase in violence perpetrated in the name of religion. While much has been written on the relationship between violence and religious militancy, history shows that religious people have also played a critical role in peacemaking within numerous cultures. In the new century, will religion bring upon further catastrophes? Or will it provide human civilization with methods of care, healing,

and the creation of peaceful and just societies? In this groundbreaking book, Marc Gopin integrates the study of religion with the study of conflict resolution. He argues that religion can play a critical role in constructing a global community of shared moral commitments and vision--a community that can limit conflict to its nonviolent, constructive variety. If we examine religious myths and moral traditions, Gopin argues, we can understand why and when religious people come to violence, and why and when they become staunch peacemakers. He shows that it is the conservative expression of most religious traditions that presents the largest challenge in terms of peace and conflict. Gopin considers ways to construct traditional paradigms that are committed to peacemaking on a deep level and offers such a paradigm for the case of Judaism. Throughout, Gopin emphasizes that developing the potential of the world's religions for coping with conflict demands a conscious process on the part of peacemakers and theologians. His innovative and carefully argued study also offers a broad set of recommendations for policy planners both inside and outside of government.

Neighborly Relations in an Urban Community
 Gary William Paquin 1989

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying

neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

After reading this book, readers will have a thorough understanding of how charter schools are funded and managed financially.

Water, Security and U.S. Foreign Policy

David Reed 2017-06-26 The prosperity and national security of the United States depend directly on the prosperity and stability of both partner and competing countries around the world. Today, U.S. interests are under rising pressure from water scarcity, extreme weather events and water-driven ecological change in key geographies of strategic interest to the U.S. Those water-driven stresses are undermining economic productivity, weakening governance systems and fraying social cohesion in scores of countries and, in the process, undermining the vitality of rural livelihoods, fostering local and ethnic conflicts, driving broad migratory movements and contributing to the growth of insurgencies and terrorist networks. While the U.S. intelligence community has steadily expanded natural resource concerns in their global threat analyses, our overseas development assistance remains locked into provision of water and hygienic services rather than responding to the full sweep of global water challenges including governance and policy failures, growing conflicts over water and the need for promoting sustainable transboundary water arrangements in partner countries. A fundamental departure from the past is urgently needed. Based on 18 case studies, *Water, Security and U.S. Foreign Policy* provides an analytical framework to help policy makers, scholars and researchers studying the intersection of U.S. foreign policy with the environment and sustainability issues, interpret the impacts of water-driven social disruptions on the stability of partner governments and U.S. interests abroad. The book also delivers specific recommendations to reorient U.S. development and diplomatic engagements that can forestall and prevent social disruptions and ensuing threats to U.S. prosperity and national security.

The Long Game Rush Doshi 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

To Make the Earth Whole Marc Gopin 2009-06-15 *To Make the Earth Whole* studies the art of citizen diplomacy_a process that can address clashes of religion and culture across regional

lines even when traditional negotiations between governments can fail. While faith and regional differences have been sources of division around the world in recent decades, millions of citizens are also creating bonds of friendship and collaboration that are forming the basis of a global community. Drawing on the experiences gleaned from years practicing citizen diplomacy in some of the world's most politically charged climates, scholar-practitioner of conflict resolution and rabbi Marc Gopin describes his work in Syria as a central case study of the book. The author outlines the strategic basis for creating community across lines of enmity, the social network theory to explain how this happens, and the long term vision required for a progressive but inclusive global community that respects religious communities even as it limits their coercive power over others. This powerful and practical book outlines an incremental and evolutionary strategy of positive change that stands a strong chance of success, even in today's most conservative and repressive religious and political contexts. *To Make the Earth Whole* also examines the ethical challenges of citizen diplomacy from the perspectives of both Western and Eastern philosophies and religions. The world's wisdom traditions are essential in devising a way for citizens to develop the foundations for global community.

The Handbook of Race, Ethnicity, Crime, and Justice Ramiro Martinez, Jr. 2018-06-19 This Handbook presents current and future studies on the changing dynamics of the role of immigrants and the impact of immigration, across the United

States and industrialized and developing nations. It covers the changing dynamics of race, ethnicity, and immigration, and discusses how it all contributes to variations in crime, policing, and the overall justice system. Through acknowledging that some groups, especially people of color, are disproportionately influenced more than others in the case of criminal justice reactions, the “War on Drugs”, and hate crimes; this Handbook introduces the importance of studying race and crime so as to better understand it. It does so by recommending that researchers concentrate on ethnic diversity in a national and international context in order to broaden their demographic and expand their understanding of how to attain global change. Featuring contributions from top experts in the field, *The Handbook of Race and Crime* is presented in five sections—An Overview of Race, Ethnicity, Crime, and Justice; Theoretical Perspectives on Race and Crime; Race, Gender, and the Justice System; Gender and Crime; and Race, Gender and Comparative Criminology. Each section of the book addresses a key area of research, summarizes findings or shortcomings whenever possible, and provides new results relevant to race/crime and justice. Every contribution is written by a top expert in the field and based on the latest research. With a sharp focus on contemporary race, ethnicity, crime, and justice studies, *The Handbook of Race and Crime* is the ideal reference for advanced undergraduate students, graduate students, and scholars interested in the disciplines such as Criminology, Race and Ethnicity, Race and the Justice System, and the Sociology of Race.
