Hatchet Gary Paulsen 2009-08-25 Celebrate the thirtieth anniversary of the Newbery Honor-winning survival novel Hatchet with a pocket-sized edition perfect for travelers to take along on their own adventures. This special anniversary edition includes a new introduction and commentary by author Gary Paulsen, pen-and-ink illustrations by Drew Willis, and a water resistant cover. Hatchet has also been nominated as one of America's best-loved novels by PBS's The Great American Read. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

Concepts of Biology Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand—and apply—key concepts.

Traditions & Encounters: A Global Perspective on the Past Heather Streets Salter 2014-10-07 Traditions & Encounters offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers

students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. **Lifetime Health** 2003 Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

Traditions & Encounters Jerry H. Bentley 2006 Based on Bentley and Ziegler's best-selling, comprehensive survey text, "Traditions & Encounters: A Brief Global History" provides a streamlined account of the cultures and interactions that have shaped world history. An effective part structure organizes developments into seven eras of global history, putting events into perspective and creating a framework for cross-cultural comparisons, while the strong themes of traditions (the formations and development of the world's major societies) and encounters (cross-cultural interactions and exchanges) bring focus to the human experience and help turn the giant story of world history into something more manageable. With an engaging narrative, visual appeal, extended pedagogy, and a strong emphasis on critical thinking, this concise version offers enhanced flexibility and affordability without sacrificing the features that have made the complete text a favorite among instructors and students alike. **Sociology and You, Student Edition** McGraw-Hill Education 2002-02-12 A sociology program written exclusively for high school students Sociology and You is written by successful authors with extensive experience in the field of sociology. Meet American Sociological Association standards for the teaching of sociology in high school with this comprehensive program.

Interpersonal Relationships in Education: From Theory to Practice David Zandvliet 2014-08-07 This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work

on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

Preventing Tobacco Use Among Youth and Young Adults United States. Public Health Service. Office of the Surgeon General 2012 This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.

Implementation Science at a Glance National Cancer Institute (U.S.) 2019-04-01 While many effective interventions can reduce cancer risk, incidence, and death, as well as enhance quality of life, they are of no benefit if they cannot be delivered to those in need. In the face of increasingly dynamic and resource-constrained conditions, implementation science plays a critical role in delivering cancer control practices. This 30-page workbook was written by members of the NCI (National Cancer Institute) implementation Science team and reviewed by nearly 100 public health practitioners and implementation science researchers. Through summaries of key theories, methods, and models, the guide shows how greater use of implementation science can support the effective adoption of evidence-based interventions. Case studies illustrate how practitioners are successfully applying implementation science in their cancer control programs

Social Capital and Health Ichiro Kawachi 2008 The purpose of this book is to take stock of what we have learned during the first decade of research on social capital and health. What is social capital? How do we measure it? What have we learned so far about the empirical relationships between social capital and specific health outcomes? What is the potential utility of the concept for designing interventions to improve population health? These are some of the questions that individual chapters will address. [Ed.]

Across Five Aprils Irene Hunt 2002-01-08 The Newbery Award-winning author of *Up a Road Slowly* presents the unforgettable story of Jethro Creighton—a brave boy who comes of age during the turbulent years of the Civil War. In 1861, America is on the cusp of war, and young Jethro Creighton is just nine-years-old. His brother, Tom, and his cousin, Eb, are both of fighting age. As Jethro's family is pulled into the conflict between the North and the South, loyalties are divided, dreams are threatened, and their bonds are put to the test in this heart-wrenching, coming of age story. "Drawing from family records and from stories told by her grandfather, the author has, in an uncommonly fine narrative, created living characters and vividly reconstructed a crucial period of history."—Booklist

Assessment in Health Psychology Yael Benyamini 2015-06 A thorough and authoritative record of the best available assessment tools in health psychology. *Assessment in Health Psychology* presents and discusses the best and most appropriate assessment methods and instruments for all specific areas that are central for health psychologists. Transitions Theory Afaf I. Meleis, PhD, DrPS (hon), FAAN 2010-02-17 "It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature." Score: 95, 4 Stars. --Doody's "Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory." Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of

Nursing, presents for the first time in a single volume her original "transitions theory" that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models

Skills Based Health Education Mary Connolly 2011-01-06 Skills - Based Health Education provides pre-service and practicing teachers with the pedagogical foundation and tools to develop a comprehensive PreK-12 health education program using the National Health Education Standards. Rather than solely focusing on teaching content, an approach which can prove ineffective in developing healthy behaviors, readers learn to teach the content and skills their students need to be healthy and prepared for the 21st century. The book addresses each one of the national standards with specific directions regarding how to apply the standard, and performance indicators to plan and implement performance tasks that target instruction to a student need. Readers are shown how to establish student need, select content and skill performance indicators to meet the need, and plan and implement assessment and instruction. PowerPoint Presentations and a TestBank are available as free Instructor Downloads. Companion Website includes Flashcards, Glossary, and Web Links. An electronic supplement containing important teaching tools from the text including rubrics, worksheets, and appendices is available with every new text at no additional cost!
